

SRNO PN 1175

PVT sample tool rocker table with heaters

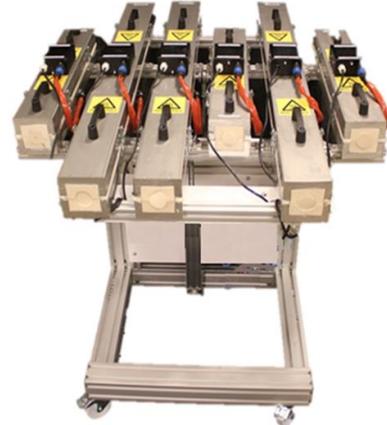

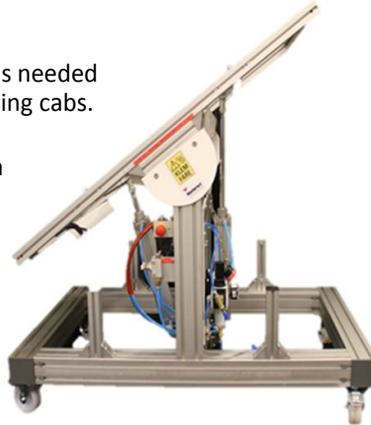

Portable mixing table on wheels with automated mixing at adjustable speed

ADVANTAGES

- Require only compressed air to operate, no power is needed
- Portable and flexible for different length tools/heating cabs.
- High capacity with a foot print of 120cm x 80cm
- Possibility to increase width even more than 120cm
- Suitable for various size heating cabinets
- Custom made heaters can be used with the mixer

APPLICATIONS

Applicable for use with Stratum Reservoir designed heating cabinets for various sampling tools sizes. Used for mixing fluid at temperature prior to transferring fluid to PVT sample bottle or other pressure vessel.

SPECIFICATIONS:

Automatic mixing using: Compressed air or Nitrogen
 Angle of rotation: 90 degrees (+/- 45 degrees)
 Supply pressure : 6-16 bar (90 psi)
 Working pressure : 6-10 bar (90-145 psi)
 Working temperature: Room – 150 deg.C
 Total length: 120 cm
 Total width (no extension): 80 cm
 Total width (w/ extension): 120 cm
 Weight without heaters: 81 KG
 Capacity (no extension): 4 pcs. heaters
 Capacity(w/ extension): 6 pcs. Heaters
 Capacity (Optional size): Custom built to client’s spec.

CERTIFICATES:

Certificate of Conformity: YES
 Pressure/Leak Test Certificate: YES
 Traceability List : YES
 CE Marked : YES

ACCESSORIES:

Custom built heaters for other pressure vessel diameters and lengths
 Redress kits, mixing ball and valves
 Re-certification of sample cylinders
 Service and maintenance of table and heaters
